

PRBM (b=1): wave-function spectrum vs entanglement spectrum (inset)

Markov cascade (annealed over sectors, so $f < 0$ is possible): analytic for $\lambda_2 < 1$, linear segment only at $\lambda_2 = 1$ Quantum Hall: $c_1 u + c_2 u^2$, $u = q(1-q)$; $c_2 = -2 b_1$ (quartic Casimir)Gauss-Bonnet cosmic branes, $d = 4$
